SUMMARY

Product Owner at a B2B SaaS startup. I take clients from messy requirements to go-live. Our latest US client went live in Aug 2026, and a US home-care provider is onboarding now. I have 2 years of end-to-end product ownership and 5+ years across QA and product.

I also build AI products end to end. I frame the problem, write the PRD, set the North Star and build a working product with Claude Code and Codex. In Rethink Systems' Mastering AI-Product Management I built Catalyst and Ungal Kural as individual projects, and co-built KidQ in a 6-person build-a-thon. I care about AI that is honest about what it doesn't know, and I'm now going deeper into AI guardrails and evals. I like building for people that technology often leaves behind.

CORE SKILLS

Product: Product Discovery, Problem Framing, PRDs, User Stories & Acceptance Criteria, Backlog & Sprint Planning, MVP Scoping, Success Metrics / North Star, UAT & Release Sign-off, Stakeholder & Client Management, Data Modelling for Client Onboarding

AI: LLM Product Design, Prompt Design, Guardrails against AI making things up, Rubric-based AI grading, AI Prototyping (Claude Code, Codex), Gemini, Groq and Sarvam APIs

Tools: Jira, Mixpanel, Supabase, Vercel, Jenkins, QuickBooks integrations, Mautic, HP Quality Center

EXPERIENCE

Product Owner & Senior QA Lead • OneHermes (formerly Akshya IT)

Sep 2024 – Present • Remote

Bootstrapped B2B SaaS CRM/PSA platform, team of about 10–12. We shape one configurable CRM to fit very different client businesses. I report to the CEO and am the primary client contact from discovery to go-live, with the founder joining key decisions. Three client engagements so far: one live, one onboarding, one taken through UAT. Joined as QA and grew into Scrum Master, QA Lead and then Product Owner. I work directly with 4 developers and guide 2 QA engineers.

- **US TPA / Record-Keeper client, live Aug 2026.** Led requirements discovery for their sales and onboarding workflows, working with the client's team through build and UAT to go-live, about a month after they shared their data. The client is in production, and I now own their enhancements.
- **US home-care provider, onboarding now.** Learned their referral-driven business and shaped our configurable CRM around it: data model, sales funnel, SOPs and reports, with handover sessions for their team. Mautic marketing integration is next.
- **German AVGS coaching platform (Jun 2025 – Mar 2026).**
 - Joined as the platform's tester and became Product Owner for the client. No requirements had been written.
 - Learned the German Employment Agency (AVGS) rules from scratch and turned them into 40+ sprint-ready user stories, covering voucher validity, mileage reimbursement and digital signatures.
 - Defined client-specific modules on our platform: scheduling (Outlook sync, 4-way conflict checks, rule-based auto-assignment), participant onboarding and attendance.
 - Defined the requirement-to-invoice logic so that only digitally signed, manager-approved sessions are billable.
 - Took the product through multiple client UAT rounds with zero P1 defects, to 90%+ launch-ready. It didn't go live after the German partner exited.
- **Payroll module.** Owned it 0→1, from discovery to release.
- **Process.** Set up a standard onboarding SOP and data template that cut client onboarding from about 3 weeks to 1–2 weeks. Introduced acceptance criteria and a Definition of Done, and developers report about 50% fewer clarification rounds. 50+ user stories written across the platform.
- **Quality & finance.** Set up the QA function (STLC, regression strategy). Ran business UAT for the QuickBooks invoice and payroll sync. Handled Jenkins Stage/UAT deployment checks.
- **Mentoring.** Trained a QA intern from scratch, and he now owns one area on his own. I also guide a QA engineer on automation: what to automate, the plan, and follow-ups.
- **Logic Luminary Award** (Jul 2025) for analytical rigour and catching edge cases before development.

AI PRODUCT PROJECTS

Mastering AI-Product Management, Rethink Systems (Cohort 8, 2026)

- **Catalyst, an AI prompting lab for teachers** (individual project, PM and build) • catalyst-ochre.vercel.app

- Teaches schoolteachers a 4-part prompt recipe and grades their prompt before it generates a worksheet. Gemini 2.5 Flash generates, and Groq grades.
- I chose prompt_graded over “worksheets generated” as the North Star, so the metric tracks real learning.
- Used by a handful of teachers. Parents also started using it to make worksheets for their own kids.
- **Ungal Kural, a Tamil civic-grievance assistant** (individual project, PM and build, 9-day MVP) • ungal-kural-psi.vercel.app
 - Voice or text intake in Tamil and English (Sarvam AI). The AI drafts the complaint, and a verified rules database routes it to the right officer.
 - Designed so the AI never invents government hierarchy, with zero fabricated routings as a success metric. Piloted on real complaints with the NGO counsellor it was built for.
- **KidQ, intentional screen time for kids 0-6** (10-day build-a-thon, team of 6, co-built) • kidq-web-prod.onrender.com
 - Designed and built the parent experience: DPDP-compliant consent, onboarding, session and wind-down logic, and parent analytics. The live parent flow runs on my spec.
- **Group case studies:** vendor onboarding orchestration (8 practitioner interviews, cycle time modelled at about 22 → 4.5 days), elder-care medication adherence (about 18 interviews), and gig-worker vehicle financing.

EARLIER EXPERIENCE

Test Lead / Programmer Analyst • Cognizant Technology Solutions

Jul 2010 – May 2013 • Coimbatore

AAA Insurance Policy Administration System (US)

- Grew from Manual Tester to Test Design Lead and then Execution Lead. SME and single point of contact for test design across multiple Scrum teams in a 50–60 member QA organisation.
- Managed 5 QA engineers and led a 6-member execution team. Owned defect triage, root cause analysis and daily reporting to the US onsite team.
- Took over production support after a senior colleague left. Associate of the Month.

CAREER BREAK & PART-TIME WORK • 2013 – 2024

- Family and caregiving. Completed an MBA, an MSc and a PG Diploma in Counselling.
- Part-time Accounts Manager at a chit-fund company. Handled statutory filings and did UAT of BFSI transaction workflows with a TCS dev team.
- Asst. Professor / Program Officer, Yoga for Human Excellence diploma. Curriculum design, teaching and counselling.
- Amazon Seller. Product strategy, Seller Central ads and conversion analytics (CTR, ACOS).

CERTIFICATIONS & EDUCATION

- Mastering AI-Product Management, Rethink Systems (2026) • ISTQB Certified Tester (95%)
- B.E. Electronics & Communication, Anna University (2010, Distinction) • MBA HR, Anna University (2014) • PG Dip. Counselling, TNOU (2016) • MSc Yoga for Human Excellence, Bharathidasan University (2021)
